

INCREASE PRODUCTION & MAXIMIZE PROFITS.

AN END-TO-END INDUSTRIAL IOT SOLUTION.

KEY FEATURES:

- Monitors machine up-time for tracking production schedules
- Senses ambient conditions like temperature and humidity of shop floor
- Simple connectivity with secure communication channels
- Generates reports in real time of every machine
- Automatically generate job-shop schedule for optimal utilization of resources on shop floor
- Artificial Intelligence algorithm based automatic generation of job-shop scheduler for optimal utilization of resources.
- Attractive UI for monitoring of scheduled activities on shop-floor
- Machine Learning based Predictive Maintenance
- IoT-based monitoring of scheduled activities on the shop floor
- Statistical reports based on strong business intelligence and analytics

KEY BENEFITS:

Keep remote check of production and maintenance schedules in real time

Logistic & Supply chain management

Predict new business opportunities through strong business Intelligence

Reduce operation cost

Production Planning and Control

Inventory management

30%
INCREASE IN
PRODUCTION

15%
COST
REDUCTION

100%
RECORD
KEEPING

100%
DATA
PRIVACY

WisersMachines

CARE has over a decade of experience in providing broad array of products, services & expertise in the area of embedded systems.

CARE has developed an embedded Industrial IoT (Internet of Things) solution under the name of WiserMachines.

WiserMachines aims to accelerate your factory's digital transformation with its intuitive and flexible IoT platform. The solution helps to easily collect data from any piece of manufacturing equipment and converts it into powerful, actionable insights that minimizes machine downtime, maximizes your production, and promotes profitability.
